

A home. A family. A future.

*A young man, forever trapped in a ventilator-dependent, quadriplegic body told me every day of the four years I cared for him as his nurse, "If I were a dog, you would have put me out of my misery. No one wants me. Why do you keep me alive? Why?"*

— Laura O. Moore, Founder and CEO, Dream House for Medically Fragile Children, Inc.

## Imagine being a homeless, medically fragile child...

*Imagine* being a child forever dependent on life-supporting treatments, medication, therapy or equipment to survive.

*Imagine* being a child who has been abused, abandoned, or both.

*Imagine* living in a hospital for months, even years, or worse yet, being forced to stay in an abusive, neglectful home because there is no other place to go.

Help Now.

## Imagine being a child with no family, no future and no hope.

Hundreds of medically fragile children in Georgia are living this existence. After suffering an illness, accident, abuse or neglect, many have been abandoned by their families or removed from their homes and placed in state custody. The lack of trained foster families or state-supported group homes, capable of caring for their complex health care needs, force these children to remain in their abusive, neglectful homes or endure prolonged hospitalizations because there are no other options.

## All children want and need the same thing.

Dream House believes every child deserves the chance to be part of a loving home where they are cared for and valued. Yet for many medically fragile children, a home and family are just a dream. *You can help us* help these children start the journey toward their dream.

Dream House for Medically Fragile Children, Inc. is a 501(c)3 non-profit organization. Our unique model of transition care increases the number of families and communities prepared to care for medically fragile children at home by:

- Providing educational programs and unique teaching environments for families and care givers;
- Assisting in the development of specially equipped and accessible homes;
- Increasing community awareness about the lives and needs of medically fragile children; and
- Creating opportunities for community and corporate partnerships focused on improving the quality of life for medically fragile children and their families.

Our vision — dramatically reduce the number of medically fragile children in foster care, improve the quality of life for these children and their families, and save the State of Georgia, the tax payers, and health care institutions millions of dollars.

## Together, we can give these special children a better life.

Dream House is making a difference for the future of these children, yet to do so has created many needs. Just like children, our needs come in many shapes and sizes. Visit us online or call today to learn more. Please help us spread the word and share our vision with others who may help make the dream come true!
